

Cyber Security

21 June 2022

1. The purpose of this memorandum and its enclosures is to establish the organization's program for maintaining cyber security and complying with regulatory requirements, industry best practices, and configuration guides.
2. Cyber security is a holistic program for managing security risks relating to Information Technology (IT). IT is broadly grouped as IT products, IT services, or Information Systems (IS). This includes IT in air-gapped environments, IT operated by contractors, and IT that supports research, development, test, and evaluation.
3. The organization's cyber security policy is a "living document" and will be represented by enclosure 1. Additional enclosures will provide Standard Operating Procedures (SOPs), diagrams, and spreadsheets for implementing this policy.
4. The point of contact for this memorandum is Victor Fernandez III, the Information Systems Security Manager (ISSM).

5 Encls

1. Cyber Security Policy
2. Cyber Security SOPs
3. Network Diagrams
4. Asset Inventory
5. Incident Response Plans
